# Our History

**2014**

Investment of €40 m in new control line

•

**2012**

Investment of €15 m for an innovative new product: Mirror Gloss

•

**2009**

Special focus on innovative surface structures and design

•

**2008**

Investment of €25 m for quality improvements and capacity enhancement

•

**2007**

FALCO becomes a part of Kronospan

•

**1997**

First postforming-factory in Hungary: Production of Worktops and Table Tops

•

**1992**

Formation of the company as a corporation (FALCO Zrt.)

•

**1977**

Product range expands: Concrete Bonded Particleboards

•

**1976**

Melamine Faced Particleboard production starts

•

**1974**

Merger between the two largest regional wood industry-companies  
(The West – Hungarian Wood Conglomerate)

•

**1966**

Construction of a second Particleboard line begins

•

**1959**

The first Particleboard producer in Hungary

•

**1952**

Transformation into a state owned company (The West – Hungarian Sawmill)

•

**1939**

Construction of the sawmill in Szombathely, Hungary

# Innovation

Innovation is the best way to lead a traditional company into the future. Let us guide you on **“the modern way of living”!**

For more than 70 years, wood has been at the center of our work. Our passion for it is evident in every single board we produce and the result of our obsession speaks for itself.

Wood-based panels from Falco are technically sophisticated products manufactured for modern furniture and interior design. This is the reason why we are one of Central Europe’s largest board manufacturers, supplying the furniture and building industries since 1939.

Life in the contemporary world demands an uncompromising attitude towards environmental protection. Therefore, our modern factory in Szombathely, Hungary was recently redesigned, taking into account the latest achievements not only in wood-based panel production but in the spirit of nature and resource-preservation as well.

Falco makes it a priority to stay in-tune with ongoing and future trends. We continuously study color developments, follow exciting architectural designs, and pursue new styles. Explore the additional new trends to our Uni, Select and Worktop collections in the Falco Decor Book.

Take a journey through the Falco Decor Book and embrace your passion for today’s colors and designs.

# Particleboard

## Product Description

Particleboards (PB) are made from wood particles and adhesives with the application of high pressure and temperature.

## Characteristics

- Excellent results in different types of processing
- Fine sanded surface well suited for different types of coating (laminating, lacquering, films, veneering etc.)
- Different characteristics regarding every different type of PB

## Applications

	P2	P3	P5	P2 B1
Furniture and interior solutions in dry conditions	•			•
Furniture and interior solutions in humid conditions		•	•	•
Furniture and interior solutions with fire retardant requirements				•
Building and construction			•

# Medium Density Fibreboard

## Product Description

Core medium density wood-based board constructed by resin-bonded wood fibres produced under high pressure and heat.

## Characteristics

- Excellent results in different types of processing
- Good milling properties
- Suitable for edge profiling and 3D processing
- High stability and durability, bending strength and internal bond
- Fine surface perfectly suited for different types of coating: laminating, lacquering, films, veneering etc.

## Applications

- Furniture and interior solutions in dry conditions
- Furniture elements (profiling and 3D processing)
- Flooring production

## Physical and Mechanical Characteristics

# Moisture Resistant and Fire Retardant MDF

## Product Description

Falco offers two different types of MDF produced by a dry method with added chemicals providing moisture resistance and fire retardance (class B1).

## Characteristics

- General purpose boards for use in humid conditions (MR MDF)
- Low swelling levels
- Fire retardant class B1 (fire retardant MDF)
- Fine surface perfectly suited for different types of coating: laminating, lacquering, films, veneering etc.
- Sustainable and recyclable

## Applications

- Furniture and interior solutions in humid conditions (MR MDF)
- Furniture and interior solutions with fire retardant requirements (fire retardant MDF)
- Furniture elements (profiling and 3D processing)
- Flooring production

## Physical and Mechanical Characteristics

# High Density Fibreboard

## Product Description

High density wood-based board constructed by resin-bonded wood fibres produced under high pressure and heat.

## Characteristics

- Excellent results in different types of processing
- Homogeneous surface
- Constant tolerance of dimensions

## Applications

- Furniture and interior solutions in dry conditions
- Back panels
- Frames
- Doors
- Packaging

# Melamine Faced Particleboard (E-LE)

## Product Description

MF BP is a high quality laminated board based on PB P2 E-LE Low Emission and designed to be used in dry conditions.

## Characteristics

- Excellent results in different types of processing
- Wide range of colors and designs
- Surface resistant to different influences - scratch resistant, high mechanical, chemical and thermal resistance, light and color fast
- Easy to maintain
- Sustainable and recyclable

## Applications

- Interior and furniture solutions in dry conditions
- Domestic and public furniture

## Physical and Mechanical Characteristics

# Mirror Gloss Boards PB P2 and MDF (E-LE)

## Product Description

The Falco Mirror Gloss products are based on high quality PB (E-LE Low Emission) and MDF (E-LE Low Emission) boards laminated by using the latest technology for the creation of a Mirror Gloss surface.

## Characteristics

- Sparkling gloss
- Scratch resistance
- Surface resistant to different influences: high wear resistance and stability, light and color fast, high durability and resilience, high chemical and thermal stability
- Easy to maintain
- Sustainable and recyclable

## Applications

- Interior and furniture solutions in dry conditions
- Domestic and public furniture

## Physical and Mechanical Characteristics

# Acrylic Gloss Boards

## Product Description

The Acrylic Gloss boards are based on MDF covered with high quality 1.4 mm thick acrylic film on the front side and a matted PS stabilizing layer on the back side.

## Characteristics

- General purpose board for use in dry conditions
- Intense gloss level
- Easy processing

## Applications

- Interior and furniture solutions in dry conditions
- Domestic and public furniture

## Physical and Mechanical Characteristics

Parameter	Norm	Unit	18.6 mm

# Veneered Particleboards

## Product Description

The Falco Veneered boards are based on high quality PB base boards covered with qualitative cut veneer. The veneer quality of the front/back side is A/B.

## Characteristics

- Wide application in the furniture industry
- High quality veneer allowing post-processing: fine polishing, lacquering, oiling

## Applications

- Interior and furniture solutions in dry conditions
- Domestic and public furniture

## Physical and Mechanical Characteristics

# Aluminium Veneered Boards

## Product Description

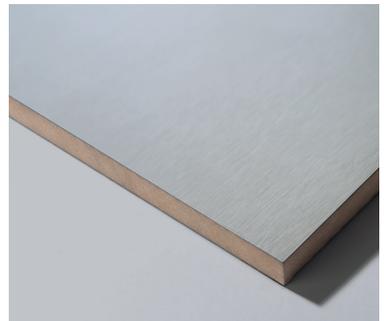

The Aluminium Veneered boards are based on MDF covered with an aluminium foil layer glued on HPL.

## Characteristics

- Easy processing with standard carpentry tools
- No need for standard metal processing
- Resistant surface
- No oxidation

## Applications

- Interior and furniture solutions in dry conditions
- Domestic and public furniture

## Packaging Information

Format (mm) \ Thickness (mm)	19
2800 x 1310	5

# Stone Veneered Boards

## Product Description

The Stone Veneered boards are based on MDF covered with a natural stone layer glued on HPL.

## Characteristics

- Easy processing with standard carpentry tools
- Natural appearance

## Applications

- Interior and furniture solutions in dry conditions
- Domestic and public furniture

## Packaging Information

Format (mm)	Thickness (mm)	
		<b>18.7</b>
2010 x 1050		5
2800 x 1250		5

# Leather Veneered Boards

## Product Description

The Leather Veneered boards are based on MDF covered with a polyurethane leather glued on HPL.

## Characteristics

- Easy processing with standard carpentry tools
- No need for sewing processes
- Soft surface

## Applications

- Interior and furniture solutions in dry conditions
- Domestic and public furniture

## Packaging Information

Format (mm)	Thickness (mm)	
		<b>19</b>
2780 x 1280		5

# High Pressure Laminate

## Product Description

HPL is constructed by multiple core paper-layers and covered with a decorative (face) resin-impregnated paper.

## Characteristics

- One of the most resistant and durable products in the furniture industry: resistant against thermal, chemical and mechanical exposure
- Wide range of colors and designs, fully covering the MF board, MG and Worktop collections
- Hygienic, easy to clean, easy to maintain

## Applications

- Interior solutions and furniture (all conditions)
- Domestic and public furniture

## Physical and Mechanical Characteristics

Parameter	Norm	Unit	Requirements	
Density	EN ISO 1183	g/cm <sup>3</sup>	min. 1.35

# Worktops

## Product Description

The Falco Worktops are based on high quality PB covered with HPL using post-forming technology, which allows the production of different profiles- one- or two-sided - on the board. The worktops are paper-stabilized with added drop-catching function.

## Characteristics

- High base board resistance
- High surface resistance
- Easy processing
- Convenient sizes
- Wide range of designs and textures
- Various thicknesses and widths
- Easy to maintain

## Applications

- Interior and furniture solutions in all conditions
- Domestic and public furniture

## Physical and Mechanical Characteristics

Parameter	Norm	Unit	8-12 mm	16-19 mm

# Back panels

## Product Description

The Back panels are one-sided laminated products based on 3 mm HDF. The Falco Back panels perfectly correspond to the MF board collections.

## Characteristics

- Easy processing
- One-side laminated
- Surface resistant to different influences

## Applications

- Back panels for corpus furniture
- Base for drawers
- Panels for different door types

# Composite Boards

## Product Description

Wood-based board constructed by three layers resin-bonded wood chips produced under pressure and heat covered with multilayer paper.

## Characteristics

- Boards for interior fitments for use in dry conditions
- Abrasion, impact and scratch resistant
- Wear-resistant
- High durability
- Easy to clean

## Applications

- Interior solutions and furniture
- Domestic and public furniture

# Finger-Joint Panels

## Product Description

The Finger-Joint panels are produced entirely from massive wood material, formed in lamellas and glued by using the so-called finger-joint in a massive board. For the production we use high quality timber.

## Characteristics

- High resistance
- Easy processing with constant sizes
- Allowing post-processing of the surface: lacquering, oiling etc.
- Various thicknesses and formats

## Applications

- Interior and furniture solutions in all conditions
- Domestic and public furniture
- Construction elements - stairs, window sills etc.

## Physical and Mechanical Characteristics

Parameter	Norm	Unit	Requirements
Density	EN 323	kg/m <sup>3</sup>	min. 742
Thickness tolerance	EN 13353	mm	1.0
Pentachlorophenol content	EN 13986	ppm	max. 5
Shearing strength	EN 386	Mpa	min. 6
Resistance to fire	EN 13986		Class Ds2 d0
Climatic conditions	EN 13986		D3; D4
